

## Environmental Policy

Red Industries is committed to the management of its environmental affairs in a caring and responsible manner.

The Company recognises its role in the protection of the environment and under this policy seeks to ;

- Comply with all applicable legislation and good environmental practice
- Improve Environmental performance by setting objectives and targets and review regularly
- Regularly evaluate its activities to achieve improvements in overall environmental performance
- Provide training to employees to achieve a high degree of environmental awareness
- Develop and maintain activities to protect and enhance the environment and prevent pollution
- Identify environmental risks and aspects and use all practical measures to bring these down.
- Reduce our impact upon the environment by using energy efficiently and conserving resources
- Operate a policy of openness with third parties
- Ensure that all suppliers and contractors operate to the same environmental standards as Red Industries.
- This policy is situated on notice boards throughout the organisation and on the Company's website [www.redindustries.co.uk](http://www.redindustries.co.uk)

The ultimate responsibility for environmental performance lies with the Managing Director who will ensure that it is given equal priority with other major business objectives.

Implementation of this policy is a line management responsibility at all levels together with participation of all employees.
